

**Work Proposal: Extending the Urban Forest at Parson's Hall
using the Miyawaki Technique**

Climate Entrepreneurship PG Cert 2023
(chronological) André Baumann, Antonia Butler, Conor Davis

Introduction

The PG Climate Entrepreneurship class of 2023 is excited to propose a collaborative project focused on environmental impact. We're proposing the expansion of the existing Urban forest at Parson's Hall, Trinity College Dublin, using the innovative Miyawaki technique.

This proposal outlines our comprehensive plan, detailing the project's approach, objectives, methodology, and timeline. We believe this initiative presents a compelling sponsorship opportunity that fosters positive change for the environment.

Objectives

- Extend the existing Urban forest at Parson's Hall to enhance biodiversity and ecosystem services.
- Implement the Miyawaki technique to accelerate forest growth and establish a resilient ecosystem.
- Create an educational and community engagement opportunity for students, faculty, and local residents.
- Promote / mention the NGO who sponsors the trees ([Sonairte.ie](#))

Methodology

- Site Assessment: Conduct a thorough assessment of the existing Urban forest area to determine expansion feasibility and identify suitable locations for extension.
- Species Selection: Select native plant species based on local biodiversity and soil conditions, in accordance with the Miyawaki technique.
- Soil Preparation: Prepare the soil using organic amendments and natural fertilisers to optimise plant growth and establishment
- Planting and Maintenance: Implement dense planting using the Miyawaki method, ensuring proper spacing and arrangement of plant species. Establish a maintenance plan for watering, weeding, and monitoring.

Timeline 2024-2025

- March/April: Site Assessment and Planning: Weeks 1-2 Completed ▾
- Aug/Sept: Soil Preparation (coffee ground, cardboard) In progress ▾
- Oct: Planting of trees Not started ▾
- Nov-Mar 2025: Establishment of plants, replacements Not started ▾
- Mar - onwards: Patch added to Operations Not started ▾

Species selection

- 1-2y old trees potentially available through [Sonairte.ie](https://sonairte.ie)

Engl	Latin
Alder	<i>Alnus glutinosa</i>
Black Thorn	<i>Prunus spinosa</i>
Dog Rose	<i>Rosa canina</i>
Elder	<i>Sambucus nigra</i>
Hazel	<i>Corylus avellana</i>
Hawthorn	<i>Crataegus monogyna</i>
Rowan	<i>Sorbus aucuparia</i>
Silver Birch	<i>Betula pendula</i>
Spindle	<i>Euonymus europaeus</i>

Budget

The proposed budget for the project includes expenses related to site assessment, plant procurement, soil preparation materials, labour costs, and ongoing maintenance.

- Estimate budget breakdown:
 - **Existing Phase 1: ~20sqm.** This phase is completed with ~60 trees / shrubs / roses.
 - **Proposed Phase 2 and 3:** Both combined is ~30sqm, and based on phase 1 we need ~ 90 trees to match existing density.
 - We are in the process of negotiating how many trees we can get from [Sonairte.ie](https://sonairte.ie) (NPO) and other sources
 - **best case:** Free with a small donation to the NPO ~300€
 - **dearest case:** 3-15eur / seedling >>> ~900€
- Funding:
 - Organisers to consider obtaining funds, in part or in full, from
 - TCD - Climate Ambassador project
 - and / or
 - Class of PG Climate Entrepreneurs

Benefits

- **Enhanced Biodiversity:** The extension of the Urban forest will contribute to increased biodiversity and habitat creation for native species.
- **Carbon Sequestration:** The Miyawaki technique promotes rapid growth, leading to increased carbon sequestration and climate resilience.
- **Educational Opportunities:** The project will serve as a living laboratory for students and researchers interested in ecological restoration and urban forestry.

Conclusion

We believe that the extension of the Urban forest at Parson's Hall using the Miyawaki technique aligns with Trinity College Dublin's commitment to sustainability and environmental stewardship. We are excited to collaborate on this project and look forward to discussing the proposal further.

Thank you for considering our proposal. We are available to address any questions or concerns and are eager to begin this transformative project.
